

37mm Lens Accessories

Century's Pro Series offers quality professional lens accessories for 37mm & smaller front-threaded camera lenses. Designed to help you go wider, reach further, and move in closer than the lens alone allows. Century's superb optics provide the finest professional images. These state-of-the-art add-ons minimize chromatic aberrations and unwanted distortion and produces images that are ultrasharp edge-to-edge. Most attach directly via 37mm thread mount. Some require step-up rings (27mm, 30mm, and 30.5mm included).

.55X Wide Angle Adapter

Here is a low-cost, high quality wide-angle solution. The .55X Wide Angle Adapter offers a lightweight single-element design that allows the user to go 45% wider without noticeable distortion. It nearly doubles the angle of view and allows close focusing—right up to the lens front—on many camcorders. Allows partial zoom only.

ODS-55WA-37

.65X HR Wide Angle Converter

For a high resolution, wide angle of view with complete zoom-thru capabilities, add the .65X Wide Angle Converter to the camera. Yields 35% wider angle of view across the zoom range, wide angle or telephoto. Realize best resolution with 3-chip cameras.

ODS-HR65-37

.3X Ultra Fisheye Adapter

Fisheyes are known for their characteristic effect and awesome barrel distortion. They exaggerate depth by making nearby objects look closer and distant objects recede. Weighing only 17 ounces, this tiny powerhouse features an ingenious design that allows easier handling.

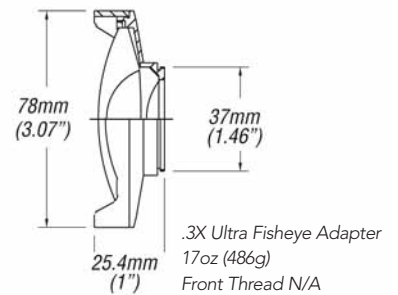

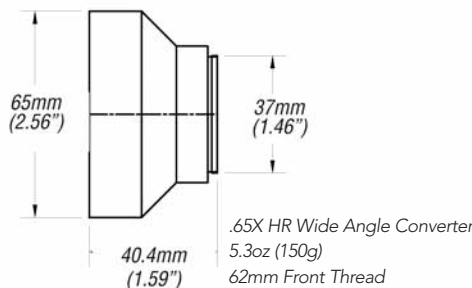

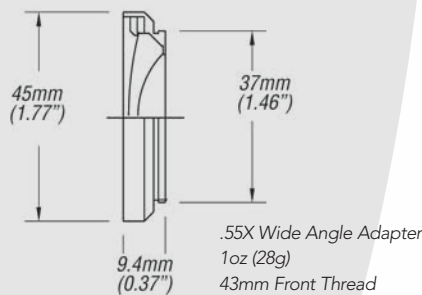

ODS-FEWA-37
