

Weaver Steadman

3-Axis head

Versatile

By mounting the Weaver Steadman Head on the Z-Jib, Aerocrane or Javelin Crane, the camera package can be rolled while suspended from a jib arm, making any move imaginable, from skimming along the ground to flying & rolling more than 360°.

Infinitely Adjustable

Mounted in an upright or suspended (underslung) position, this quickly assembled system excels in situations that require extreme tilts, extreme low angles, or near nodal point configurations. The 3 axes permit the camera to pan, tilt & roll close to the lens axis.

Features

- Rotates 360 degrees with most types of film & video cameras
- Can be used with film magazines up to 1,000' in size
- Rotates a continuous 360 degrees. Pan & tilt with lenses up to 10:1
- Smooth pan & tilt with your choice of hand wheel or fluid PTR
- Pan Bar System offers one man pan/tilt, zoom & focus
- Joystick Control System offers one man pan/tilt, zoom & focus
- Works on all types of crane arms

Specifications

2-Axis Height (Minimum Configuration)	2' 1"
2-Axis Width (Minimum Configuration)	1' 9"
2-Axis Depth (Minimum Configuration)	1'
3-Axis Height (Minimum Configuration)	2' 8"
3-Axis Width (Minimum Configuration)	2' 2"
3-Axis Depth (Minimum Configuration)	2' 1"
2-Axis Weight	61 lb
3-Axis Weight	93 lb
2-Axis Payload Capacity (Recommended)	120 lb
3-Axis Payload Capacity (Recommended)	90 lb
